Dear Madam,

Good morning.

This is bring to you notice that that first resolution may be changed as below:

All the board members resolved and finalized the course structure for PUC Biology (theory and practicals). It was designed for two years, having four semester courses. The course has three credits. All the board of studies members have suggested allotting the five credits (4 Theory, 2 Tutorials 2 Lab) to Biology course in MBiPC stream to give equal weightage to the students with other major subjects in PUC.

The Unit sequence in the syllabus of third semester of Elementary biology may be changed as below to get better understanding for the students:

1. Human physiology
2. Biochemistry & Molecular Biology
3. Genetics
4. Biotechnology
5. Ecology
6. Evolution.

Thanking you madam,

Dr. G. Tirupati Reddy

HOD Biology,

RGUKT-RKV.
